

SABIC® PP 680K

PP random copolymer for Blow moulding

Description:

SABIC® PP 680K is a new development grade in the blow moulding product range. Impact, transparency, stiffness are well balanced and give you the opportunity to make very nice blow moulding products. High transparency, contact clarity and gloss will produce appealing blow moulded bottles. These properties, combined with a high heat deflection temperature, result in a wide variety of applications where this material can be used.

Application:

SABIC® PP 680K is used for various blow moulding processes like Extrusion Blow Moulding and Injection (Stretch) Blow Moulding. 680K applications range from household to personal care products, but the material is also very suited for food packaging where a high heat distortion could be required.

Health, Safety and Food Contact regulations:
