

SABIC® Vestolen P 9421

PP random copolymer for Pipe extrusion

Description:

This random copolymer has a high molecular weight with special designed properties required for high demanding pressure pipes. It is highly heat stabilised and especially formulated for extraction resistance. This grade with long service life is used for the manufacturing of cold and hot water pipes and fittings for transport of drinking water. It complies with German regulations for materials in contact with water intended for human consumption (BGA requirements and KTW recommendations).

Health, Safety and Food Contact regulations:
